

Information sheet data supply

Technical overview

General information	<ul style="list-style-type: none">• The print data is reproduced on a scale of 1:1
Data format	<ul style="list-style-type: none">• PDF-X4 with Acrobat 8 compatibility (PDF 7.1) with preserved Acrobat layers• AI (Adobe Illustrator) or EPS
Colours	<ul style="list-style-type: none">• Colour profile Coated FOGRA39• Colour Mode: CMYK• PANTONE Formula Guide Solid Coated• HKS K• PANTONE Neon / Pastel colours can not be printed. <p>Elements that are structured in RGB are automatically converted to the CMYK colour space and will then be printed. This can lead to a colour deviation between the data and the print result</p>
Fonts	<ul style="list-style-type: none">• Please convert the fonts you use into paths or provide us with the font code used
Elements / Pictures	<ul style="list-style-type: none">• For an optimal print result, we recommend vectorized data with a line width of more than 0.1 pt• Images require a resolution of at least 300 dpi in the output size
QR-Code	<ul style="list-style-type: none">• QR-Codes require a minimum size of 10 mm to ensure readability
Mandatory information	<ul style="list-style-type: none">• Food labelling in the EU is regulated by the Food Information Regulation.• We place this mandatory information when creating the proof for you. The area for these mandatory texts is marked on our templates• We require a complete postal address. Please enter the desired address in your order
White underlay	<ul style="list-style-type: none">• We print with transparent colours. These are not opaque on transparent foil, therefore we recommend to print the desired colours with a white underlay• The white underlay should be created and named as a solid colour
